NOTICE of WORK

Date: 10/01/2015

To: Residents and Businesses

From: Laura Wheelock P.E.
Public Works Engineer

Subject: Queen City Park Road Bridge Deck Repairs

The Department of Public Works (DPW) is about to begin repairs to the Queen City Park Road (QCPR) Bridge Deck. This notice is to alert residents and businesses that will be impacted by the project, provide information about the activities, and identify the contact at DPW should you have any questions and concerns.

What is planned:

The QCPR Bridge Deck Repair project will remove the asphalt pothole patching on the deck surface. The project will remove deteriorated concrete and replace with repair material, thereby restoring the top of the bridge deck. The project will then add a waterproofing membrane and new smooth asphalt driving surface across the entire deck to preserve the remaining life of the bridge deck. Work will also be done to improve pedestrian safety on the walkway by adding a rubrail and toe kick to the back of the bridge railing.

To complete the planned repairs it is necessary to close the bridge to traffic through the duration of the work. Pedestrian traffic will be maintained primarily on the existing walkway, but will not be permitted across the bridge deck while work is occurring in that area. While the work on the pedestrian walkway is being performed pedestrians will be directed to cross in the travel lane of the still closed bridge. DPW is asking you to plan accordingly.

When:

Work is scheduled to start the week of October 12, 2015 and continue for approximately 4 weeks. During this time the bridge will be closed to all vehicle traffic.

Who:

The selected contractor is Cold River Bridges, LLC.

Thank you for your cooperation. If you have any questions please contact Laura Wheelock at LWheelock@burlingtonvt.gov or (802) 540-0397.
